Subject: Ground Water Discharge Permit No. UGW350006 - Zone 1 Reservoir

Dear Mr. Whitehead:

The above referenced permit became effective on January 26, 1993.

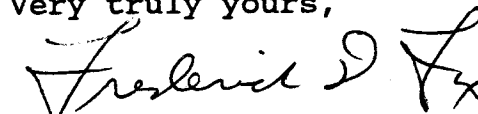

The Division of Water Quality completed its review of the "As Built" documentation and submitted a letter to Kennecott on July 20, 1993 stating that the construction conformed to the approved design.

As we discussed on August 10, 1993, the Zone 1 Reservoir has not been placed into service and may not be until the need arises, which may be this fall or next spring.

Because the permit requires compliance monitoring and reporting requirements, Kennecott will submit to the Division a statement that there has been **No Discharge** to the Zone 1 Reservoir in lieu of the monitoring and reporting requirements of Part II of the permit. We will continue to do so until we actually discharge into Zone 1, after which the applicable monitoring and reporting requirements will go into effect.

If you have any questions on this approach, please give me a call at 569-6555.

Very truly yours,

Frederick D. Fox
